*Privately published under the auspices of the*  
**MEDICAL LIBRARY ASSOCIATION INC.**  
**FRIENDS OF THE <sup>and the</sup> ARMY MEDICAL LIBRARY**  
 Washington, D. C.

Me  
dec

**REPORT to the**  
**Friends of the Army Medical Library**  
**and the**  
**Medical Library Association**

This second year of the Current List of Medical Literature has been marked by the acceptance of the Medical Library Association of joint sponsorship with the Friends of the Army Medical Library for the publication of the Current List. As in the case of the Friends, no financial obligation is assumed, but only a common interest pledged in the purposes of this undertaking to aid medical and library research.

The distribution of the Current List has now reached approximately one thousand copies weekly, of which considerably more than one hundred copies are being sent without charge. These go to military and other establishments engaged in the war effort as well as to a certain number of medical libraries which have failed thus far to become subscribers.

The income from subscriptions is now paying, approximately, the cost of publication but it is providing nothing toward the cost of the preparation and publication of an index. As will be recalled, the index issued for the first year covered only the references to the periodicals not indexed by the Quarterly Cumulative Index Medicus. With the second year, an attempt is being made to index everything of obvious medical interest and thus to make the Current List complete for present and future reference purpose. This will call for a financial outlay about equal to that required for the publication itself. It is estimated that an index to the 60,000 or more titles, published annually, will require more than 400 printed pages. The typing of copy and the printing and mailing of this will cost more than \$1,500. The work of indexing, now done voluntarily, amounts to a full time job. Eventually, the salary of a qualified person to do this work will have to be counted in the cost of the index. Thus it will be apparent, that supplementing and prolonging the usefulness of the Current List by means of an index cannot be done on a self-supporting basis without a large increase in the number of subscribers.

The question of the desirability of an index, naturally, will be raised in view of the fact that this field is covered at present by the Quarterly Cumulative Index Medicus. This publication is an exceedingly costly undertaking and according to reports is published by the American Medical Association at a considerable loss.

The experiment of acquainting research workers with the current literature, of providing them with microfilm copies of what is not available otherwise, and of indexing it for future use, at a cost within the means of those being served, seems well worthy of careful examination. It is particularly from this point of view that the interest of the "Friends" and members of the Medical Library Association is asked.

# I. Anatomy; Histology

Am. J. Anat., 1942, 71: No. 3.

- WILLER, R.A., & RIDDLE, O. The cytology of the adrenal cortex of normal pigeons and in experimentally induced atrophy and hypertrophy. 311-41.
- KRAMER, T.C. The partitioning of the truncus and conus and the formation of the membranous portion of the interventricular septum in the human heart. 343-70.
- WISLOCKI, G.B. Studies on the growth of deer antlers: on the structure and histogenesis of the antlers of the Virginia deer, *Odocoileus virginianus borealis*. 371-415.
- HUNTER, M.W., & SAWIN, P.B. The effects of thyroidectomy on the skull of the domestic rabbit. 417-49.
- HAMILTON, J.B. Male hormone stimulation is prerequisite and an incitant in common baldness. 451-90.

## 5. Bacteriology; Parasitology

J. Parasit., Lancaster, 1942, 28: (Dec.)

- DINABURG, A.G. The efficiency of the Sherman apparatus in the recovery of larvae of *Haemonchus contortus*. 433-40.
- RODANICHE, E.C., & KIRSNER, J.B. The effect of sulfonamide compounds on the growth of *Endamoeba histolytica* in culture. 441-9.
- GOBLE, F.C., & COOK, A.H. Notes on nematodes from the lungs and frontal sinuses of New York fur-bearers. 451-5.
- TRAGER, W. A strain of the mosquito *Aedes aegypti* selected for susceptibility to the avian malaria parasite *Plasmodium lophurae*. 457-65.
- WILLIAMS, C.O. Observations on the life history and taxonomic relationships of the trematode *Aspidogaster conchicola*. 467-75.
- LEVIN, A.J., & EVANS, T.O. The use of roentgen radiation in locating an origin of host resistance to trichinella spiralis infections. 477-83.
- EWING, H.E. Remarks on the taxonomy of some American chiggers, Trombiculinae, including the descriptions of new genera and species. 485-93.
- PROGRAM and abstracts of the eighteenth annual meeting of the American Society of Parasitologists, New York, December 28, 29, and 30, 1942. Suppl., 1-6.
- FERGUSON, M.S. Development of the metacercariae of *Diplostomum flexicaudum* in the lenses of frogs, turtles, birds, and mammals. Suppl., 9.
- CABLE, R.M., & MC LEAN, R.A. The occurrence of cercaria clausii Monticelli, a marine rattenkongi cercaria, on the west coast of Florida. Suppl., 9.
- STUNKARD, H.W. The life of cycle of *Zoonitides laevis* Linton, 1940. Suppl., 9.
- MUELLER, J.F. The dorso-ventral axis in *Taenia pisiformis*. Suppl., 13.
- JONES, A.W. *Stempeleia sonnei* n. sp., a microsporidian, Protozoa; Sporozoa, parasite of cestodes. Suppl., 10.
- SHELANSKI, H.A., PIOUS, W.L., & FRANK, J.H. Intestinal parasitic infections in a state mental hospital, and control with aluminum hydroxide and colloidal kaolin. Suppl., 10.
- STONER, T.L., & MELENEY, H.E. Anaerobiosis and cholesterol as growth requirements of *Endamoeba histolytica*. Suppl., 11.

- VON BRAND, T., REES, C.W. ET AL. Studies on reducing substances and gas formation in cultures of *Endamoeba histolytica* and a single species of symbiotic bacteria. Suppl., 11.
- VENNICH, D.H. Morphological characters of the trichomonad flagellates of man. Suppl., 12.
- HOGUE, M.J. *Trichomonas vaginalis* in tissue cultures. Suppl., 12.
- MC MULLEN, D.B. The life cycles of 3 dermatitis-producing cercariae, Trematoda; Schistosomatidae. Suppl., 12.
- BEAVER, P.C., & MC MULLEN, D.B. Methods of investigation on the life cycles of avian schistosomes. Suppl., 13.
- HUNTER, W.S. Studies on cercariae of the common mud-flat snail *Cerithidea californica*; general infection data. Suppl., 13.
- GOODNIGHT, C.J. Taxonomic value of the tooth formula of *Xironodrilus*, Branchiobdellidae. Suppl., 14.
- BALL, G.H. Hydrogen-ion concentration of amoebic ulcers. Suppl., 14.
- STABLER, R.M., & FED, L.G. Intravaginal survival of culture *Trichomonas tenax*, buccalis, in man. Suppl., 14.
- MORGAN, B.B. Inoculations of *Trichomonas foetus*, Protozoa, in guinea pigs. Suppl., 15.
- THOMPSON, P.E., & HUFF, C.G. Exoerythrocytic schizogony in a new species of saurian *Plasmodium*. Suppl., 15.
- YOUNG, M.D., MC LENDON, S.B., & SMARR, R.G. The effects of thio-bismol upon 3 species of therapeutic malaria. Suppl., 15.
- TALETZKY, E., & BROWN, H.W. The mechanism of quinine action in malaria. Suppl., 15.
- TRAGER, W. The influence of biotin upon susceptibility to malaria. Suppl., 16.
- GOULSTON, F. The cooical nature of avian *Toxoplasma*. Suppl., 16.
- WOLFSON, F. Maintenance of human *Toxoplasma* in chicken embryos. Suppl., 16.
- WRIGHT, W.H., & ROZICEVICH, J. Minimum heat treatment required for the destruction of trichinae in pork scraps in garbage. Suppl., 17.
- JONES, M.F., & HOLLANDER, A. The effect of long ultraviolet and near visible radiation on the eggs of the nematodes, *Enterobius vermicularis* and *Ascaris lumbricoides*. Suppl., 17.
- FISCHTHAL, J.H. *Phyllodistomum ethiostomum* n. sp., Trematoda; Gorgoderidae, from percid fishes. Suppl., 18.
- CANNING, G.A., & FISHER, J.M. Increased mortality in rats with concomitant dual infections. Suppl., 18.
- BECKER, E.R. The effect of dry-heating the ration on oocyst production in *Eimeria nieschulzi* infections. Suppl., 18.
- NAIMAN, D.N. Effect of x-radiation upon the resistance of rats to *Trypanosoma lewisi*. Suppl., 18.
- FISCHTHAL, J.H. Number of larvae and time required to produce active immunity in rats against *Trichinella spiralis*. Suppl., 19.
- ROSS, R.M., & CULBERTSON, J.T. *Trichinella* skin tests in apparently normal individuals. Suppl., 19.
- MELCHER, L.R. Immunological studies on a polysaccharide and protein fraction isolated from *Trichinella spiralis*. Suppl., 20.
- STOLL, N.R. Active immunization of sheep against large single test infections of *Haemonchus contortus*. Suppl., 20.

- MAYHEW, R.L. Some preliminary experiments on a skin test for immunity to the stomach worm *Haemonchus contortus* in the calf. Suppl., 20.
- OLIVIER, L. Acquired resistance to the gapeworm *Syngamus trachea* in the turkey and ring-necked pheasant. Suppl., 20.
- CULBERTSON, J.T., & ROSE, H.M. Skin tests in schistosomiasis *mansoni* patients with antigen from *Pneumococcus mediopneumoniae*. Suppl., 21.
- FALLIS, A.M. Resistance to *Ascaris lumbricoides* L. in guinea pigs and the eosinophilia associated with infection. Suppl., 21.
- LARSH, J.E., JR. The relation of splenectomy and resistance of old mice to the mouse cestode, *Hymenolepis nana* var. *fraterna*. Suppl., 21.
- EISENBRANT, L.L. The effect of *Ascaris suum* extract injections upon chickens infected with *Ascaridia lineata*. Suppl., 22.

In regard to the index, an attempt will be made to improve upon the long established strictly alphabetical arrangement by segregating the various subdivisions of medical research and indexing alphabetically each of these. It is intended by this means to so classify the subject matter that under each principal heading will be found all references pertaining to that subject. This plan is in accord with the tendency toward specialization made necessary by the continuing expansion in scientific knowledge. A recent development along this line has been the subdivision of the Journal Biological Abstracts into five sections, each of which treats of only one part of the entire subject and each of which can be obtained separately. This has already taken place in certain fields of medical science as, for example, mental hygiene, psychiatry, and psychology, which subdivision is now covered independently and completely by the publication Psychological Abstracts. As just pointed out, if an index is to become a permanent part of the Current List, either many more subscribers will have to be obtained, or some source of financial assistance found.

One of the principal conveniences of this publication is that it makes it unnecessary for the busy research worker to go to the library to examine the current journals. It was expected that this feature would be appreciated sufficiently by many individuals so as to induce them to want a personal copy. This hope has been realized to only a very limited extent. The cooperation of librarians in bringing this advantage to the attention of the readers who consult their current journals would certainly be helpful. Also, the cooperation of all our "Friends" in bringing the publication to the attention of those who may be able to use it with profit, is needed. It is purely a cooperative undertaking and the aid of everyone interested in it is required to make it a success.

ANNOUNCEMENT. A notable if experimental step toward facilitating the dissemination of medical literature which has just been taken by the Librarian of the Army Medical Library, is the decision to substitute microfilm copying without charge for the interlibrary loan of books in all cases where they may be desired by accredited libraries. This has been made possible by the acquisition of equipment required for the expanding needs of photoduplicating service to military and emergency establishments. The increased facilities now permit the Library to send out limited amounts of microfilm copies of articles in bound journals at no greater cost than is entailed in sending out and getting back books on interlibrary loan, considering the damage suffered by the passage of books in the mails. It is thus now able to extend its service to medical research by the adoption of this highly efficient means of rendering its collections more widely available.

This marks the beginning of the recognition of microfilm copying as a service which public reference libraries might render to those at a distance on the same gratuitous basis that long custom has authorized them to serve those who are able to come in person to the library. The gradual extension of microfilm copying in lieu of loans of scientific journals may perhaps contribute as much to the advancement of science as any other innovation of library practice of recent times.

A.S.
